## **DETAILED ACTION**

***The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.***

### ***Drawings***

Applicant should ensure that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hahnewald, et al. (US 4,986,173). Regarding new claim 10, case of Hahnewald, et al. inherently “rests on” the base (8) when the base is connected to the case. Regarding

new claim 11, the base and case are constructed to allow the base to be connected to the case by an inherent pivoting movement (by hand) of the case relative to the base. Thus, the features of the instantly rejected claims are structurally met by either one of the references.

### ***Response to Arguments***

Applicant's arguments filed December 27, 2005 have been fully considered but they are not persuasive. Applicant argues that "there is absolutely no disclosure in this reference of a base that is removable from a case" and "Thus, all of the claims define patentably over the applied reference by their recitations relating to 'a base connected to a case.'" However, it is to be clearly pointed out that element (8) of Hahnwald, et al. reads as a "base" and is clearly, therefore, "a base removably connected to a case". Simply stated, the toaster disclose in the reference does include a base that is removably connected to a case.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the base disclosed and claimed in the present application, is a component that *supports* the toaster case,) are not recited in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). This action is a **final rejection** and is intended to close the prosecution of this

application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.
